

Release Note

EYEESEE Cloud Version 1.20

December 2024

Release note | EYESEE Cloud Version 1.20

To enhance your EYESEE experience and ensure continuous improvement, we have integrated new features and made updates within the EYESEE Cloud application.

The improvements featured in the **Decembre 2024** delivery of **version 1.20** are as follows.

Table of contents

Release note EYESEE Cloud Version 1.20	2
1. Dashboard	3
2. Face	3
3. Performed mission	3
4. Inventory	4
5. Search in customer area or warehouse area	4
6. Various.....	4

1. Dashboard

— What's new

- ✔ **Customer report / warehouse report:** a new graph has been added: the total number of 'pallet' locations inventoried. Display in cumulative hours if the selection is less than or equal to 7 days.
- ✔ **Dashboard:** the minimum acceptable value for the re-do and operator movement graphs has been updated to 15%.

2. Face

— What's new

- ✔ **Face modification:** clarification of face version management: the version number is retained when a face changes from 'disabled' to 'activated' status.
- ✔ **Face copy:** when copying a face, it is now possible to activate it directly when saving.

— Fixes

- ✔ **Face modification:** the checkbox for applying the modification to the entire selection is automatically ticked as soon as a field is modified.
- ✔ **Face copy:** the 'text to search for' has been changed to refer only to the name of the face in the naming.

- ✔ **Creating a new version of a face:** by clicking on the 'Create a new version of the face' button, this new 'draft' version is displayed directly.
- ✔ Various minor improvements

3. Performed mission

— What's new

- ✔ **Performed mission's analysis and modification:** 6 new pallet status have been added.

4. Inventory

— Fixes

✓ **Inventory creation / modification:** clearer errors if the expected codes present in the added expected file are on locations of type 'Not used' or 'Forbidden'.

5. Search in customer area or warehouse area

— What's new

✓ **Search a location / code:** A search function has been added to the menus in the customer and warehouse areas. Searches can be made by location name or by code (read or expected).

6. Various

— What's new

✓ Various minor fixes.
